System Feature	Supplies Performance Features
Card Cleaning for the MXD™ Mailer Card Delivery System	Our advanced turret cleaning system thoroughly cleans the entire front and back of the card in one pass, using cleaning rollers and cleaning tape supplies. The MXD Mailer system optimizes cleaning cycles to achieve high supply conservation and consistent performance, eliminating the need for the additional expense of downstream cleaning supplies.
High Speed Quality Forms Personalization	The in-line high speed form printers offer cost effect performance solutions allowing personalized text and messaging for each mail-ready package. The printer toner cartridges and other consumables are all backed by our full twelve month warranty. We guarantee each supply will meet expected high quality and performance requirements with assurance of Datacard worldwide support.
In-line Card To Form Affixing	The MXD series systems utilize pressure sensitive transparent card affixing stickers. The dual-sided stickers provide permanent adhesion to the paper form with removable adhesion to the card. This allows easy card removal from the form with no glue residue and offers the versatility of reapplying the card during production quality verification checks
